Re: Insultex House Wrap

Dear Mr. Riccelli:

I am writing to express my appreciation for your Insultex House Wrap. I recently purchased a home in Franklin County, Virginia which I had totally rebuilt. One of the first things we did was to remove the old siding and then wrap the house with your Insultex House Wrap. During the entire winter, my contractors were working on the inside of the house without the benefit of an operable HVAC system. We depended solely on a small portable space heater for heat. The workers and I were amazed at how easy it was heat the home with such a small heater and how well the home maintained its heat. I attribute this to the excellent insulating properties of your product. Of course, I had previously experienced these properties in your Artic Gear. I also own a coat and pants made of Insultex, which have kept me toasty warm in freezing weather conditions. It was my experience with the suit that made me decide to purchase the house wrap. As expected, I am very pleased with the performance of your house wrap product. I have recommended it to several of my friends and relatives who are contemplating building or renovating.

Thank you for your product.

Very truly yours,

WEAVER LAW FIRM, P.C.
